This project gave me the opportunity to get an insight into some of the tasks to be implemented using data structures and algorithms using Python.

## PROJECTS

---

- **Blog creation ( Aug 2019 )** : A Project developed in the early days of my college life, which introduced me to the world of Web Development. I was a part of the team which worked on the back end part of the code for developing an article blog,, which facilitates people to log in and read top rated articles on dashboard, edit their profile and more such basic activities.
- **Image caption generator (IIIT Kottayam, 2019-20)** : This was a project which started as just an experiment by a bunch of tech enthusiasts out of curiosity. This project implements a code that takes an image as input and outputs the caption of the image in a short yet meaningful way. This project especially taught me the importance of working as a team and bringing the best out of each other.
- **Vocal and music segregation (IIIT Kottayam, 2020-21)**: A project being developed under a CSE faculty of our college. This project is implemented to segregate the music and vocals from a song using deep learning in an efficient way. This project taught me the importance of meeting tight deadlines.
